

# EARLY EDUCATION

## STANDARDS-ALIGNED ASSESSMENTS FOR K-2

**Our earliest learners need a strong foundation to prepare them for future learning.**

**Teachers need an easy way to understand their individual students' needs to personalize instruction.**

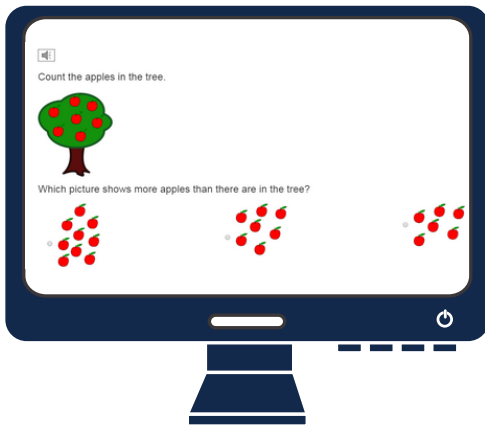

New K-2 online interim assessments help educators preserve instructional time and provide reliable student learning data to support instruction.

Here's how:

- Quickly and efficiently gauges students' progress with key literacy and numeracy skills
- Reduces testing time with short, engaging tests that can be administered together or separately
- Uses graphics and audio cues to engage early learners while minimizing screen time
- Ensures consistent administration through an easy-to-use interface, delivered on laptops and tablets.

# LEARNING WHAT WORKS

Use data to differentiate instruction to prepare early learners for future success

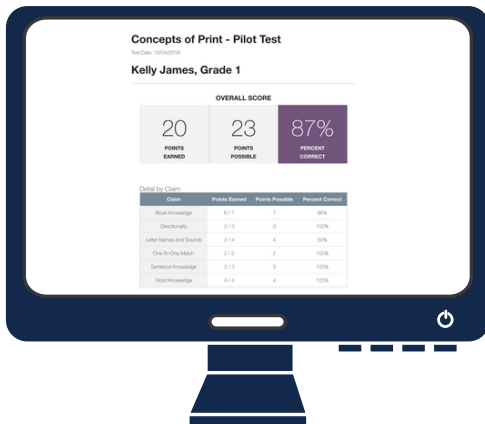

## Mathematics

Comprehension of early numeracy, number sense, patterns, adding and subtracting, and fluency

## English Language Arts

Concepts of print, reading comprehension, and written expression

## Real-Time Reports

Individual student and class data with full detail by skill, category, and domain aligned to state standards.
